Curriculum Map – AA in Business Management

Business Management Department Courses	Graduates will apply economic reasoning, computational skills, and appropriate technology skills to produce relevant business-related reports.	Graduates will demonstrate sound management skill-sets inclusive of written and verbal communications, while using appropriate accounting/computational practices.	Graduates will analyze, synthesize, evaluate and appropriately use management skills within individual, team, and/or group organizational contexts.	Graduates will apply Lakota values (respect, generosity, wisdom, and fortitude) with reference to leading and managing business programs and organizations.
