## Department Reflection Questions

*\*The prompts below are suggested topics. If there are others that you need to cover, feel free to pivot. You know best how to utilize this time!*

+ What are some of your biggest takeaways from the first month of classes? Are there any themes or trends that come out?

+ What are some procedures or policies that could be clearer? Where did you see students or other faculty get confused? What are your suggestions to improve them? (consider emailing to Dan and Cheryl if appropriate)

+ What data are you committed to collecting from your classes this semester to help understand the effectiveness of your program to meeting your program learning outcomes?

+ Who has been in contact with a student from the Emerging Scholars program? (remember that they need to have a 30-min (minimum) check-in with their advisor each month and pass 75% of their classes to earn the second part of the scholarship.

+ Are there any issues that you would like to align on as a department?
